

ArtDex — 3 分钟 Demo 视频脚本

情感版 · 收集机制 × 相遇记忆 | 总时长约 3:05 (含防伪)

H0 — Hack the Zero Stack | Vercel · Amazon DynamoDB · Amazon Bedrock · Amazon S3

A. 完整分镜 (防伪已加入)

#	时间	画面	旁白要点
0. Hook	0:00–0:15	人流匆匆 → 定格一人静立《星空》前	富豪买得走作品,你买不走;但你能留住相遇的那一刻
1. Problem	0:15–0:36	拍完就走、照片埋进相册	匆匆而过,相遇即逝,没温度没回忆
2. Solution	0:36–0:55	三机制卡:GPS 候选集 / 稀有度 / Legendary 限现场	把参观变成收集,必须“在场”
3. Capture (含防伪)	0:55–1:28	拍照→Bedrock 识别→Legendary 庆祝;末尾对复制品拍被拦	候选集 narrow→识别准;对复制品 → repro 拦截
4. Moment (情感核心)	1:28–1:54	拍立得显影:作品+自拍+时地+手写笔记	重点不是识别,是留住“你和它相遇的一刻”
5. Reunion (串记忆)	1:54–2:18	再遇同作→再记录→时间线 Tokyo / Paris	作品会旅行,你的相遇被串成一生的时间线
6. Dex+地图	2:18–2:36	图鉴双视图 + 世界地图点亮	Van Gogh 3/12,足迹遍布世界
7. Database /架构	2:36–2:56	架构图 + AWS 控制台真实截图	Vercel+DynamoDB+S3+Bedrock;时序模型撑起记忆线
8. Close	2:56–3:05	logo + 链接 + #H0Hackathon	买不走杰作,但能留住遇见它的那一刻

B. 逐字配音稿 (English VO · 直接念)

语速约 2.8 词/秒 (自然口语),括号内为该段秒数与画面。整体约 3:05,超时先砍标 □ 的句子。

[0:00–0:15 · Hook]

A billionaire can buy a masterpiece at auction. You can't own the Starry Night — but you can own the moment you stood in front of it. ArtDex is built to keep that moment.

[0:15–0:36 · Problem]

We rush through world-class art. We snap a blurry photo, turn around, and by the time we're at the gift shop the encounter is already gone. □ No warmth, no memory, no reason to ever come back to it.

[0:36–0:55 · Solution]

ArtDex turns the visit into a collection. GPS narrows recognition to the works exhibited right where you stand. Every piece has a rarity tier — and the legendaries can only be claimed on-site.

You have to be there.

[0:55–1:28 • Capture + 防伪]

Watch. I photograph The Starry Night. It goes to Claude vision on Amazon Bedrock, matched against only today's on-site works — so it's fast and reliable. Match — Legendary — and the celebration scales with the rarity. And try to cheat with a flat reproduction? Bedrock flags it as a repro and blocks the catch. □ You can't fake being there.

[1:28–1:54 • Moment]

But the catch isn't the point — the moment is. ArtDex develops it like a Polaroid: the artwork, your selfie beside it, the date, the place, a line in your own words. Not a screenshot lost in a camera roll — a keepsake of your encounter with this piece.

[1:54–2:18 • Reunion]

And art travels. See the same masterpiece again — another city, another year — and ArtDex records it again, then strings every encounter into one timeline. Tokyo, 2025. Paris, 2026. Your history with a single artwork, growing over a lifetime.

[2:18–2:36 • Dex + Map]

It all fills a personal Dex — Van Gogh, three of twelve — and every encounter drops a pin on your living world map. Your art footprint across the planet.

[2:36–2:56 • Database / 架构]

Under the hood: Next.js on Vercel, with all data in Amazon DynamoDB — serverless, pay-per-request. Because artworks travel, we model location as a time-bounded relationship and snapshot where each work was at every encounter — that's what makes the memory timeline possible. Selfies live in Amazon S3, recognition runs on Amazon Bedrock. Here's the data, live in DynamoDB.

[2:56–3:05 • Close]

ArtDex. You can't buy the masterpiece — but you can keep the moment you met it.

念稿小抄

- 必念的 4 个 AWS 名词 (评分检查项) :Amazon DynamoDB、Amazon Bedrock、Amazon S3、Vercel —— 全在镜头 3 与 7,别漏。
- 超时优先砍 □ 三句 (Problem 尾、Capture 尾、就近) ,砍完约 2:48。
- GPS 桌面录制用 **NEXT_PUBLIC MOCK_LOCATION="lat,lon"** 把自己放到馆门口才解锁 Legendary。
- 镜头 7 的 AWS 控制台截图 (DynamoDB 行 + S3 对象列表) 是 “data stored” 硬证据,务必入镜。
